

Turning your Motorola 2247 Modem/Router into a Wireless Router

1. With the Ethernet (yellow) cable plugged into your computer, open your Web Browser.
2. In the URL box put <http://192.168.1.254> hit enter.
3. Next you should be asked to enter a user name and password. Username is admin, Password is your phone number with a - example 468-0000
4. Click on Expert mode, click OK
5. Click on Configure
6. Click on Wireless
7. Check the box enable wireless
8. SSID is the name you will see from your wireless network. Enter what you would like to see. Example (Our Home Network; Home Network)
9. Leave "Enable Wireless Protected Setup (WPS)" Unchecked
11. Pre Shared Key is the password for your wireless connection. Enter what you would like, but it should be at least 8 characters long.
12. Click on Save Changes
13. "Do you want to restart your router" YES

The Modem/Router should restart.

Make sure you use the Ethernet cable or the wireless connection never both on one computer as it may interrupt your DSL service.

This is the Screen you should see
