

CALLER ID BLOCKING

YOUR PHONE

YOUR PRIVACY

YOUR CHOICE

COMPLETE BLOCKING (Maximum Privacy Protection)

By ordering Complete Blocking, Siskiyou Telephone will automatically prevent your phone number from being transmitted to the person or business you are calling.

However, you can still choose to transmit your number on selected calls by pressing *82 (1182 on rotary phones) before you dial your number. Blocking does not work when calling 800 and 900 services or 9-1-1.

SELECTIVE BLOCKING (Minimum Privacy Protection)

To block transmission of your phone number, you must press a code before you make each call. Press *67 (1167 on rotary phones) before you dial your call, and your number will not be sent to the person or business you are calling. Blocking does not work when calling 800 and 900 services or 9-1-1.

Customer's that do not make a choice will be put on selective blocking. There is no charge for either option.
