

SPECIAL CALLING SERVICES

It's your call!

Why not make the most of it?

Whether you're taking or making a call, our custom calling features offer you convenience, control and flexibility...
a real value.

Extra Line

This feature enables the customer to have a second phone number on a 1 party access line. Each telephone number is assigned a unique ringing pattern so the customer can determine the nature of the incoming call. Additional directory listings for the second phone number are also available.

Warm Line

This feature means that you can have your phone set up to automatically dial a predesignated telephone number after a specific amount of time (30 seconds).

To Activate Warm Line

Simply knock the receiver off the hook and after 30 seconds it will automatically dial the specific telephone number that you had the telephone company program.

Call Waiting

If you have an incoming call while you're already on the line, the Call Waiting feature will alert you. You may then put the first party on hold while you catch your second call. It will greatly reduce missed calls due to a busy phone!

Call Forwarding

This feature means your phone can transfer incoming calls to another number of your choice. Call Forwarding is great for the business person who wants to catch after-hours business calls at home, or for anyone who doesn't want to miss an important call.

Three Way Calling

This feature lets you turn an everyday two-way phone call into a three-way conversation. It's easy!

Speed Calling 8

Now you can call up to 8 of your most frequently dialed numbers just by dialing a one-digit code. This includes long distance DDD numbers.

Speed Calling 30

Now you can call up to 30 of your most frequently dialed numbers just by dialing a two-digit code. This includes long distance DDD numbers. It's a real time-saver!

SPECIAL CALLING SERVICES (cont.)

Voice Mail

Allows you to leave messages any time day or night to specific telephone numbers and retrieve messages from any touch tone phone.

Class Features

For more information please call the business office at 467-6000.

Internet Service

Surf Globally • Link Locally

Easy convenient access to World Wide Web, Electronic Mail and News Groups from your home or office. See 23 for current service areas.

Caller ID

Lets you know who is calling before you answer the phone. Caller ID requires a display unit which will also store names and telephone numbers of recent callers.

Call Waiting ID

Has all the benefits of Caller ID and it also let's you identify your Call Waiting calls before you answer. Call Waiting ID requires the use of a special display unit.

To Block

Anonymous Calls

Caller ID customers may also subscribe to Anonymous Call Rejection. After this feature is put on your line it would need to be activated by dialing *77 (rotary 1177).

Anonymous Call Rejection informs callers who have blocked their name and number that the party they are trying to reach does not accept blocked calls. The blocked caller is informed that they can unblock their call by hanging up, picking up the receiver, dialing *82 (rotary 1182) and redialing the telephone number.

To cancel Anonymous Call Rejection, lift the receiver and dial *87 (rotary 1187).

Telemarketer Screening

This feature blocks most of the calls that are unknown or out of area and gives the caller a recorded announcement, which can be bypassed by a live caller. This feature is included with Anonymous Call Rejection.
